

Thank you all for your continued support during this time - going by the latest announcements it seems that we will be carrying on with remote learning for some time to come, ... But never fear, Dynamic Earth Online is here!

We are continuing to update our new website with lots of STEM resources which you can use as inspiration for class topics, fun at-home science lessons, and to encourage your learners to find out more about issues like global warming and the climate crisis.

Coming up next week, we have:

Monday -

We are celebrating #NationalStorytellingWeek with ideas for an outdoor 'on the go' story!

Tuesday -

It is World Wetlands Day so we are exploring these important ecosystems with a fascinating fact sheet.

Wednesday -

How to make your own set of 'story dice' - learners can use them to come up with a story all about our amazing planet and their vision of it's future.

Thursday -

Join Dynamic Earth for a storytelling session - sit back, relax and get cosy while we tell you a story all about bees!

Friday -

To round off celebrating #NationalStorytellingWeek, we have a link to SoundCloud for your learners to listen to stories from around the world about different experiences of climate change.
